

Team Inventory

Cardio Quest Team

Mentor: Morgan Nicholson

Project Sponsor: Dr. Jared Duval, Assistant Professor

Playful Health Technology Lab

Members:

Jesse Ceja

Tyler Jeffrey

Rique Yazzie

Anna Cheatham

2/12/2026

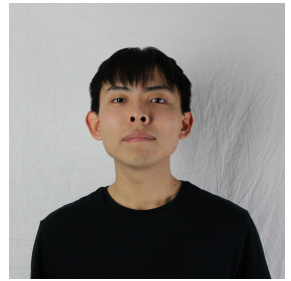

I. Overview

The purpose of this document is to introduce the members of our team. The following pages outline our skills, experience, training, and other details to help visualize our team's capabilities.

Rique Trujillo Yazzie

B.S. Computer Science | Flagstaff, AZ | rty7@nau.edu | [LinkedIn](#)

Education

Northern Arizona University, Flagstaff, AZ

Expected Graduation **December 2026**

Bachelor of Science, Computer Science

CS377: Mobile Application Development

Spring 2026-Current

- Understand basic GUI conceptual models like MVVM and MVC and how these can translate into various mobile app architectures and design tools
- Gained a basic understanding of mobile app distribution, including beta testing, informal distribution and app store registration and posting
- Created a simple mobile app that involved learning GUI design and layout, toolchain selection, app programming and testing

Coconino Community College | Flagstaff, AZ

High School Diploma

- Successfully completed an Introduction to Python and an Introduction to Computer Information Systems course, with credits transferred to Northern Arizona University

Experience

Frontend Developer | Marvel Rivals Website

Fall 2024-Spring 2025

- Developed interactive UI components using JavaScript, HTML, and CSS to enhance user experience
- Collaborated with a team to integrate features, optimize performance, and maintain clean, organized, and flexible code
- Participated in debugging, performance optimization, and code review processes

Skills

Programming & Web Development:

- Proficient in HTML, CSS, JavaScript, C, Python, and C++, developed through CS396 and Web Programming Projects

Collaboration & Leadership:

- Experienced leading teams of 2-4 members and working independently, demonstrating flexibility and adaptability to changing project goals.

Version Control & Code Management:

- Skilled in Github, managing and sharing codebases across group projects and personal development

Interests

I enjoy playing and analyzing the art, music, and mechanics of video games which fuel my creativity and I hope can inspire future programming projects. I like to listen to music, it enhances my creativity and focus. Learning to create personal websites through my experience in web development allows me to experiment with different designs, coding, and interactive features while giving me a chance to express my technical creativity.

Jesse Ceja

B.S. Computer Science | Phoenix, AZ | jvc68@nau.edu | [LinkedIn](#)

Education

Northern Arizona University

Expected Graduation **December 2026**

B.S in Computer Science, GPA 3.82 (Unweighted)

Dean's List

Every Semester, from **Fall 2023- Fall 2025**

- **CS 312: Web Programming II**

- Key development role in the creation of a Task Management Website. Used Node.js and React to create responsive web design.
- Developed a REST API that pulled from a locally hosted SQL database, the Task Management Website used this database and API to store user Tasks as well as account information, allowing them to log into the website from any device and have their data delivered to them.

- **CS 377: Mobile Application Development**

- Developed mobile apps for Android in Android Studio, using the Kotlin programming language.
- Used RESTful APIs and dynamic UX design to ensure the mobile app felt responsive and provided users with live data.

Valley Vista High School

Graduated **2023**

High School Diploma, GPA 3.93 (Unweighted)

Experience

Video Game Developer

May 2025-Current

Floaty Boat Game Studio

- Founded **Floaty Boat** studio, solely responsible for marketing, developing, and publishing **Speedial Phoenix**. Published to Newgrounds.com and Itch.io.
- Gained in-depth knowledge of the Godot Engine.
- Ensured an optimized code base to allow smooth gameplay, and used benchmarking strategies to ensure quality user experience across many devices.
- Basic use of creative software such as Krita and Audacity, gaining knowledge of techniques to produce multiple media types.

Skills

Game Design:

- **GDScript:** Enabled complex interactions between players and the virtual world (Work on Speed Dial Phoenix), tracking time spent, “combos”, and other statistics.

PERN Stack Developer

- **Web Design:** Used PostgreSQL, Express.js, React.js, and Node.js to develop server and client side web applications (CS 312).

Interests

Over the most recent summer I decided to see if I could pick up development in the Godot Game Engine. This is how I learned that I want to be a game developer for the rest of my life. I started programming when I was roughly 11 years old, but it was only when I developed my first full game that I found the specific field I wanted to contribute to. Story development and giving people an outlet acts as one of my key motivations.

Tyler Jeffrey

B.S. Immersive Media and Games | Phoenix, AZ | tsj78@nau.edu | [LinkedIn](#)

Education

Northern Arizona University | Flagstaff, AZ

Expected Graduation **May 2027**

B.S in Immersive Media and Games | GPA 3.95

- **IMG421 (2D Game Engines):**
 - Mastered component-driven architecture and developed playable prototypes focusing on modular mechanics and team-based code sharing
- **IMG411 (Real-Time Rendering):**
 - Applied WebGL API to manage 3D lighting, cameras, and object manipulation for browser-based interactive scenes.

Madison Highland Prep | Phoenix, AZ

Graduated **August 2023**

High School Diploma | GPA: 4.49

Experience

Lead Developer | NAU | Slime Chronicles

September 2026-December 2026

- **Systems Logic:** Engineered the core game loop and component-based architecture in a 2D engine, ensuring modularity for future mechanic expansions.
- **Asset Pipeline:** Developed a streamlined workflow to import and optimize custom sprites and animations, maintaining high performance during real-time rendering.

UI/UX Designer | NAU | Upkeep

January 2025-May 2025

- **UI/UX Design:** Conducted user research and iterative prototyping to design a game and quiz interfaces, focusing on intuitive navigation and accessibility.
- **Frontend Systems:** Implemented foundational JavaScript systems and jQuery interactions in a web-based project, establishing the codebase that the rest of the team built upon.

Skills

Game & Graphics Programming

- **C# & GDScript:** Highly proficient through developing 2D and 3D prototypes in Unity and Godot (IMG 420), focusing on player controllers and game state management.
- **GLSL:** Gained experience writing custom shaders for real-time rendering and visual effects in high-level graphics courses.

Systems & Logic Development

- **C++ & C:** Mastered through implementing memory-managed data structures and developing programming language interpreters.
- **Python:** Extensively used to build and test AI agents, including pathfinding and machine learning algorithms.

Full-Stack Web Technologies

- **JavaScript, HTML, & CSS:** Developed proficiency by developing the architecture for a web-based project and deploying cloud-hosted web apps.

Interests

I am someone who loves to balance my passions between technicality, physicality, and creativity. **Dance, roller skating, and music** are all ways I like to stay active while bringing expression and diversity into my daily life. **Baking and hairstyling** are also core creative outlets for me; both require close attention to detail and aesthetics. Of course, my love for **making games** is matched by my love for **playing them**, keeping me closely connected to the community within gaming and allowing me to express myself in the highly technical world of programming.

Anna Cheatham

B.S. Software Engineering | Mesa, AZ | alc984@nau.edu | [LinkedIn](#)

Education

Northern Arizona University | Flagstaff, AZ

Expected Graduation **May 2027**

B.S in Software Engineering | GPA 3.84

- **CS 386 Software Engineering**
 - Practiced working on a project in a real-world scenario with all the planning phases and life-cycle stages carried out.
- **CS 470 Artificial Intelligence**
 - Mastered using artificial intelligence to solve problems, specifically created an AI that played a game against the user.

Mesa High School | Mesa, AZ

Graduated **May 2023**

High School Diploma

Experience

- **I unfortunately have no software engineering or computer science work experience with real users**

Skills

- Leadership and communication skills gained while working on many school projects.
- Strong understanding of Microsoft Office and Google Workplace having used it frequently throughout.
- Proficient in C, Python, HTML, CSS, and Javascript from NAU classes such as CS249, or CS212.
- Able to present information clearly and concisely.
- Proficient at reading and understanding most coding languages after taking CS 396.
- Fast learner that is very keen to learn and get things done efficiently.

Interests

My interest in programming started with **making little games** on the website Scratch. I also love **playing various different video games** on multiple platforms which sparked that drive to create some. I also enjoy **reading** and **fictional writing** whenever I have time. I have a strong passion for **movies** and the different worlds they create. I love **music** and making so many different playlists for the movies or shows I'm watching or books I'm reading. I also **crochet** and **knit** things, such as graphic design blankets or clothes, for myself and for others.
